

# Rigid (Hard) Plastics

## Accepted at the following sites:

Catlett  
Corral Farm  
Markham  
Marshall  
Morrisville  
New Baltimore

## How to Prepare for Recycling:

- Place rigid plastics in the bulky waste containers at remote sites.
- Rigid plastics need to be empty and clean, free of dirt and food residue.
- Recycle battery operated plastic toys with electronics at Corral Farm only
- Difficult to handle plastic items can be brought to Corral Farm where attendants will assist off loading

## Why Recycle?

The plastic is sorted, washed and then granulated. Once in this state it can be used as a raw material by manufacturers and made into items like drain pipes, garden furniture, fleece jackets and sleeping bags, as well as flower pots, buckets, and trash cans.

Through this collection program, approximately 30 tons of rigid plastic items were diverted from the landfill in FY16.

Baled rigid plastics ready for shipment
